THE BIG BAMBOOZLE II:

It was the United State of America and its Government that moved not the laws of the USA nor the people of the USA that moved

Cutouts Double Cutouts Circumstantial Evidence

A "cut out" is something indirect that prevents Node "A" from Node "C" from being direlty linked.

In Miami Vice S4 E14 *Baseball of Deaths* (perhaps testes are implied but the term was for round CLuster Bombs) Crocket and Tubs are chasing an arms dealer tied to homicides.

> Crockett and Tubbs suspect a Chilean police chief of both murder and dealing in illegal weapons, but find he is being protected by the federal government.

THe police chief was working for a Strongman in Chile and importing high grade military weapons from the USA with the tacit approval of the US Government. Whiel in the USA he is blackmailed by a pimp and prostitute.

In the arms dealing an arms supplier says to the Commandante "These items are on the export ban list. I will have to use cut-out countries to ship through doubling my costs." This occurs 17 minuets into the episode. The cut-out country avoid Arms dealer "A" from delivering arms to Nation "C" in a direct and detectable way. There is another example of a Double Cut Out. It is also called "enforcing the enforcer." THe arms dealer had a body guard. The arms dealer (Commandante of a nations security police somewhere in Latin America) had a body guard. The body guard killed the person how had evidence of use of a prostitute the arms dealer was to be blackmailed with. So the body guard of the Commandante kills the pimp attempting blackmail. But now the body guard knows what has happened. So next the body guard is hit. Now there is no one left other than the Commandante who knows what happened in the dark alley that night.

Killing your own ally in a Double Cut Out is what I assert has happened in events around me tied to fraud but since the fraudsters have killed their own fraudster assets I alone know what had happened. Double Cut Outs are like lock nuts. A nut on a bolt on a motorcycle may shake loose. It is more likely to rotate to loose than to tight. If you put the same nut on the same bolt the two nuts would just move together. But a lock nut uses a reverse thread. What is loosening to one nut is the tightening direction to the other. THe nuts can not move together along the bolt.

Bobby Courtney and Jimmy were mental health patients used in frauds against me and told me they were doing it. Later they were found dead. Veronica Hoffman also. And Tom Donegan too. And Jen Moore too. And now possibly Jessica Aber. Chris Lloyd possibly too.

Plausible Deniability

The indirect rather than direct involvement allows for plausible deniability. Cut outs mostly overlap if not fully with circumstantial evidence.

Frauds against me do not use direct evidence. A person or a room is wired by the police and I am linked to the room in some way. Through the floor plan of the apartment, the street address of the apartment building I

may have rented a similar room or that room at a different time or been near that apartment. In that apartement a fraud will occur I am indirectly linked to circumstantially linking me to the events of that apartment.

Cut Outs of Indirect Linking of Persons to Misconduct

- **Doube Entenderes** A Double Entendere may overlap with a different meaning. Using the vagueness a possible second meaning to the double en-tender will become the indirect link to something fraudulent. What is the meaning of entendre? to hearEntendre is the French verb "to hear" and can also mean "to understand." The English expression "double entendre" describes a word with two meanings. Bunko is based on creating misunderstanding.

- **Voodo Dolls or Effigy** A Fraudster talking to another Fraudster is using his or her partner in fraud as a Voodoo Doll of the Target of Harassment. Because the Voodo Doll is next to the person the Voodoo Doll represents the comment passes through the Voodo Doll to the Target of the Fraud.

- **Incriminating Items** Such as child underwear may be left around. Through the circumstance that the item was near a Target of Fraud the Target of Fraud may be linked through the presence of that item to abuse of the child. In some cases a child wearing clothes of the type that might be of interest to a peeper may be on a person staging they are a victim. Through the dress of a person or clothes left from a person near a Target of Fraud the Target of Fraud is linked to that to something not true.

- **InculpatoryMorphication** By the "street theater" of others a person not in an illegal or immoral acts is made to appear to be morphing the image of what is true into something not true. Individuals, their groups, their actions, or their belongings may be subject to this. Groups may be infiltrated covertly to change the apparent behavioral character of the group or items may be treated as bombs, hidden cameras, etc., during staged evnts being acted out.

  Street Theater uses Pantomimes. -- Roman pantomime was a production, usually based upon myth or legend, for a solo male dancer-clad in a long silk tunic and a short mantle (pallium) that was often used as a "prop"-accompanied by a sung libretto (called the fabula saltica or "dance-story") rendered by a singer or chorus (though Lucian states that originally the pantomime himself was the singer). Music was supplied by flute and the pulse of an iron-shod shoe called a scabellum. Performances might be in a private household, with minimal personnel, or else lavish theatrical productions involving a large orchestra and chorus and sometimes an ancillary actor. The dancer danced all the roles, relying on masks, stock poses and gestures and a hand-language (cheironomy) so complex and expressive that the pantomime's hands were commonly compared to an eloquent mouth. Pantomime differed from mime by its more artistic nature and relative lack of farce and coarse humour, though these were not absent from some productions. -- Wikipedia

Jumping to conclusions (officially the jumping conclusion bias, often abbreviated as JTC, and also referred to as the inference-observation confusion is a psychological term referring to a communication obstacle where one "judge[s] or decide[s] something without having all the facts; to reach unwarranted conclusions". In other words, "when I fail to distinguish between what I observed first hand from what I have only inferred or assumed". Because it involves making decisions without having enough information to be sure that one is right, this can give rise to poor or rash decisions that often cause more harm to something than good. - Wikipedia

In the Laws of the USA Conspriacy Against These Rights

- **Equal Protection Guaranteed in the 14th Amendment** The Reconstruction Era law ensured all were equally protected from crime or adverserial actions of the US (or as later interpreted) State governments. Allowing, directing, or encouraging criminals to attack a Targeted Individual is a violation of Equal Protection.

- **Self Defense** Different jurisdictions allow deadly force against different crimes. All American states allow it against prior deadly force, great bodily injury, and likely kidnapping or rape; some also allow it against threat of robbery and burglary.

It is commonly reported FBI misconduct has bullied victims into fights often lethal to a bullied person.
